The MAILING DATE of this communication appe	ears on the cover sheet with the c	correspondence add	ress				
THE REPLY FILED 31 May 2005 FAILS TO PLACE THIS APP	PLICATION IN CONDITION FOR A	LLOWANCE.					
 The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods: a) The period for reply expires 3 months from the mailing date of the final rejection. 							
event, however, will the statutory period for reply expire later th	b) The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection. Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO						
MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).		•				
Extensions of time may be obtained under 37 CFR 1.136(a). The date on been filed is the date for purposes of determining the period of extension a CFR 1.17(a) is calculated from: (1) the expiration date of the shortened strabove, if checked. Any reply received by the Office later than three month earned patent term adjustment. See 37 CFR 1.704(b). NOTICE OF APPEAL	and the corresponding amount of the fee. atutory period for reply originally set in the is after the mailing date of the final rejection	The appropriate extensio final Office action; or (2) on, even if timely filed, ma	on fee under 37 as set forth in (b) by reduce any				
2. The Notice of Appeal was filed on A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a). AMENDMENTS							
3. The proposed amendment(s) filed after a final rejection, but prior to the date of filing a brief, will <u>not</u> be entered because (a) They raise new issues that would require further consideration and/or search (see NOTE below); (b) They raise the issue of new matter (see NOTE below); (c) They are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for							
appeal; and/or (d) ☐ They present additional claims without canceling a corresponding number of finally rejected claims. NOTE: (See 37 CFR 1.116 and 41.33(a)).							
4. The amendments are not in compliance with 37 CFR 1.121. See attached Notice of Non-Compliant Amendment (PTOL-324). 5. Applicant's reply has overcome the following rejection(s):							
6. Newly proposed or amended claim(s) would be a the non-allowable claim(s).		, timely filed amendm	ent canceling				
7. For purposes of appeal, the proposed amendment(s): a) how the new or amended claims would be rejected is pro The status of the claim(s) is (or will be) as follows: Claim(s) allowed: <i>None</i> . Claim(s) objected to: <i>None</i> . Claim(s) rejected: 1-27. Claim(s) withdrawn from consideration: <i>None</i> .		vill be entered and an	explanation of				
AFFIDAVIT OR OTHER EVIDENCE							
8, The affidavit or other evidence filed after a final action, because applicant failed to provide a showing of good are and was not earlier presented. See 37 CFR 1.116(e).							
9. The affidavit or other evidence filed after the date of filing a Notice of Appeal, but prior to the date of filing a brief, will <u>not</u> be entered because the affidavit or other evidence failed to overcome <u>all</u> rejections under appeal and/or appellant fails to provide a showing a good and sufficient reasons why it is necessary and was not earlier presented. See 37 CFR 41.33(d)(1).							
10. ☐ The affidavit or other evidence is entered. An explanation REQUEST FOR RECONSIDERATION/OTHER		•					
11. The request for reconsideration has been considered but does NOT place the application in condition for allowance because: <u>See Continuation Sheet.</u>

SUPERVISORY PATENT EXAMINES

Continuation of 11. does NOT place the application in condition for allowance because. Ewing et al. (U.S. Patent No. 5,949,974) does not only show the advanced configuration and power interface (ACPI) as claimed by the applicant but also teaches that SNMP defines a client/server relationship. The client program, network manager 20, makes virtual connections to the server program, the SNMP agent 22 and 24 on a remote network device. The database controlled by the SNMP agent is the management information base (MIB). The MIB is a standard set of statistical and control values that provides information about the attributes of devices attached to the network. SNMP allows for the extension of these standard values with values that are specific to a particular SNMP agent through the use of private MIBs. The use of private MIB variables allows SNMP agents to be modified for a variety of devices, e.g., bridges, hubs, routers and CSU/DSUs, etc. SNMP operates by exchanging network information through protocol data unit (PDU) messages. PDUs carry variables that have both titles and values. There are five types of PDUs that SNMP uses to monitor a network, two for reading terminal data, two for setting terminal data, and one, the trap, monitoring network events. Every SNMP message consists of a variable, and every variable consists of a variable title, the integer, string data type of the variable, whether the variable is read-only or read-write, and the value of the variable. The SNMP manager 20 collects information via MIBs about routers, hubs, bridges, concentrators, servers, switches and other inter-networking devices. When a problem at a remote node is detected, the corresponding SNMP agent issues an alarm that identifies the problem by type and node address (e.g., col. 7 lines 30-55).
